Benchmark	4.18%	5.25%	5.01%
Benchmark 2	4.15%	4.75%	4.74%

Benchmark - ICE BofA 3-Month U.S. Treasury Bill Index

Benchmark 2 - ICE BofA 1 Year Treasury Note Index

The ICE BofA 3-Month U.S. Treasury Bill Index is an unmanaged index of Treasury securities maturing in 90 days that assumes reinvestment of all income. ICE BofA 1 Year Treasury Note Index is an unmanaged index comprised of a single issue purchased at the beginning of the month and held for a full month. The issue selected at each month-end rebalancing is the outstanding 2 year Treasury Note Bill that matures closest to, but not beyond 1 year from the rebalancing date. The benchmark index mentioned is an unmanaged statistical composite of stock or bond market performance. Investing in an index is not possible. Index returns do not reflect any fees, expenses or sales charges.

Performance data quoted represents past performance, which is no guarantee of future results. The investment return and principal value of an investment in the Fund will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. **Current performance may be higher or lower than performance data given. For performance information current to the most recent month-end, visit <https://www.westernsouthern.com/touchstone/etfs/ultra-short-income-etf>.** From time to time, the investment advisor may waive some fees and/or reimburse expenses, which if not waived or reimbursed, will lower performance. Returns assume reinvestment of all distributions. Returns are not annualized for periods less than one year. Investing involves risk, principal loss is possible. ETFs may trade at a premium or discount to their net asset value. Market price returns are based on the consolidated market price and do not represent the returns you would receive if you traded shares at other times.

Yield

	Fund
30-Day SEC Yield	4.40%
30-Day Unsubsidized SEC Yield	4.30%

Unsubsidized is calculated without expense waivers. **The 30-Day SEC Yield** is calculated by dividing the net investment income per share (as defined by industry regulations) earned by a fund over a 30-day period by the maximum public offering price. This number is then annualized. **The 30-Day SEC Yield** reflects the rate at which a fund is earning income on its current portfolio of securities and does not necessarily reflect income actually earned and distributed by a fund and, therefore, may not be correlated with a fund's past distributions actually paid to shareholders.

Morningstar Ratings

	Overall	3 Year
ETF	★★★★	★★★★
Funds in US Fund Ultrashort Bond Category	225	225

The Morningstar Rating™ for funds, or 'star rating', is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds and separate accounts) with at least a 3-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating™ does not include any adjustments for sales load. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its 3, 5, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% 3-year rating for 36–59 months of total returns, 60% 5-year rating/40% 3-year rating for 60–119 months of total returns, and 50% 10-year rating/30% 5-year rating/20% 3-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent 3-year period actually has the greatest impact because it is included in all three rating periods. Class A Share star ratings do not include any front-end sales load and are intended for those investors who have access to such purchase terms. ©2026 Morningstar, Inc. All Rights Reserved. Why Invest

The Fund seeks maximum total return consistent with the preservation of capital by investing primarily in fixed income securities.

Investment Style

- Selects fixed income securities believed to be attractively priced relative to the market or to similar securities
- Conducts a disciplined approach focused on security selection and research
- Invests primarily in investment grade debt securities
- Avoids higher risk strategies, such as non-dollar currencies
- While the fund may invest in securities with any maturity or duration, interest rate risk is managed by maintaining an effective duration of one year or less under normal market conditions. Duration is a reasonably accurate measure of a debt security's price sensitivity to changes in interest rates and a common measure of interest rate risk. A lower duration indicates a lower sensitivity to interest rates

Fund Characteristics

	Fund	Benchmark	Benchmark 2
Total Number of Holdings	243	1	1
Weighted Average Maturity (years)	0.9 years	0.2 years	1.0 years
Weighted Average Duration (years)	0.7 years	0.2 years	1.0 years
Effective Duration 0-1 Years	75.6	100	100
Effective Duration 1-3 Years	24.14	0	0
Effective Duration 3-5 Years	0.26	0	0
Effective Duration 5+ Years	0	0	0
Portfolio Turnover Rate	101%		

The portfolio turnover rate is annualized as of 12/31/2025. Subject to change. Average effective maturity is the average time remaining until scheduled principal prepayment by issuers of portfolio securities, accounting for potential cash-flow changes. Total number of holdings includes cash equivalents, but excludes currencies.

Credit Analysis

	(% of Portfolio)
AAA/Aaa	39.3
AA/Aa	14.0
A/A	17.1
BBB/Baa	16.0
BB/Ba	1.7
B/B	0.5
Cash Equivalents	11.5

Source: Sub-Advisor

Data may not total due to rounding. Credit quality is calculated using the ratings assigned by a nationally recognized statistical rating organization (NRSRO) such as Standard & Poor's or Moody's Investors Service. When ratings vary, the highest rating is used. Credit ratings equivalent to AAA, AA, A or BBB are considered to be high credit quality ("investment grade"); credit ratings of BB and below are lower quality securities ("below investment grade" or "high yield"). Where no rating has been assigned, it could be for reasons unrelated to the creditworthiness of the issuer. The credit quality ratings apply only to fixed income securities and not the fund or its shares. Ratings are subject to change.

Sector Allocation

(% of Portfolio)	Fund	Benchmark	Benchmark 2
Asset Backed Securities	33.0	0.0	0.0

There is no guarantee that the fund will continue to hold any one particular security or stay invested in any one particular sector. Holdings are subject to change.

A Word About Risk

The Fund invests in fixed-income securities which can experience reduced liquidity during certain market events, lose their value as interest rates rise and are subject to credit risk which is the risk of deterioration in the financial condition of an issuer and/or general economic conditions that can cause the issuer to not make timely payments of principal and interest also causing the securities to decline in value and an investor can lose principal. When interest rates rise, the price of debt securities generally falls. Longer term securities are generally more volatile. The Fund invests in mortgagebacked securities and asset-backed securities which are subject to the risks of prepayment, defaults, changing interest rates and at times, the financial condition of the issuer. The Fund invests in investment grade debt securities which may be downgraded by an NRSRO to below investment grade status. The Fund invests in noninvestment grade debt securities which are considered speculative with respect to the issuers' ability to make timely payments of interest and principal, may lack liquidity and has had more frequent and larger price changes than other debt securities. The Fund invests in U.S. government securities which are neither issued nor guaranteed by the U.S. Treasury and are not guaranteed against price movements due to changing interest rates.

The Advisor engages a sub-advisor to make investment decisions for the Fund's portfolio; it may be unable to identify and retain a subadvisor who achieves superior investment returns relative to other similar sub-advisors. Events in the U.S. and global financial markets, including actions taken to stimulate or stabilize economic growth may at times result in unusually high market volatility, which could negatively impact Fund performance and cause it to experience illiquidity, shareholder redemptions, or other potentially adverse effects. Financial institutions could suffer losses if interest rates rise or economic conditions deteriorate. The Fund's service providers are susceptible to cyber security risks that could result in losses to a Fund and its shareholders. Cyber security incidents could affect issuers in which a Fund invests, thereby causing the Fund's investments to lose value. The Fund invests in Collateralized Loan Obligations (CLOs) that have risks that largely depend on the type of underlying collateral and risks may include illiquidity, limited active market, the possibility that distributions from collateral securities will be insufficient to make interest or other payments, the potential for a decline in the quality of the collateral, and can bear the risk of default by the loans. The Fund invests in foreign securities which carry the associated risks of economic and political instability, market liquidity, currency volatility and accounting standards that differ from those of U.S. markets and may offer less protection to investors. The Fund invests in municipal securities which may be affected by uncertainties in the municipal market related to legislation or litigation involving the taxation of municipal securities or the rights of municipal security holders in the event of bankruptcy and may not be able to meet their obligations.

The Fund may experience higher portfolio turnover which may lead to increased fund expenses, lower investment returns and higher short-term capital gains taxable to shareholders. The Fund invests in repurchase agreements which are considered loans by the Fund and may suffer a loss of principal and interest in the event of counterparty defaults. Current and future portfolio holdings are subject to change.

Please consider the investment objectives, risks, charges and expenses of the ETF carefully before investing. The prospectus and the summary prospectus contain this and other information about the Fund.
